EDUCATION

Hitotsubashi University

Apr. 2023 – Present

Bachelor of Science in Social Data Science

Tokyo, Japan

- Achieved the highest entrance examination score across all departments and maintained a GPA of 4.06/4.3
- Relevant Modules:** Sets and Topology I, Introduction to Probability, Linear Algebra I, Linear Algebra II, Calculus I, Calculus II, Regression Analysis I, Causal Inference, Practical Machine Learning I, Practical Machine Learning II
- Dissertation (Work in Progress):** *Constructing Bias-Adjusted Rating Metrics to Capture True Restaurant Popularity* supervised by Dr. Ryo Kato.

London School of Economics and Political Science

Sept. 2025 – June 2026

General Course, Department of Statistics

London, UK

- Awarded a full scholarship from Hitotsubashi University to participate in the General Course
- Relevant Modules:** ST202 (Probability, Distribution Theory and Inference), ST227 (Survival Models), ST300 (Regression and Generalised Linear Models), ST307 (Aspects of Market Research), DS202A (Data Science for Social Scientists), MG205 (Econometrics: Theory and Applications)

TEACHING AND ADDITIONAL EXPERIENCE

Teaching Assistant

Sept. 2024 – Jan. 2025

Hitotsubashi University

Tokyo, Japan

- Supported faculty in the Introduction to Social Data Science II course by mentoring students on survey methodology and questionnaire design, supporting analyzing collected survey data, and providing constructive feedback on academic presentations

Selected Student Contributor

Hitotsubashi University

Tokyo, Japan

- Promoted the academic department to prospective students by serving as a panelist for open campus sessions broadcast on YouTube, participated in a student and faculty discussion published in a Toyo Keizai magazine, and authored a seminar introduction for the official university booklet

PROJECTS

All these projects below can be accessed through my personal portfolio website ([Portfolio](#)) and GitHub ([GitHub](#))

Predictive Modeling of Sleep Health

- Achieved a First Class equivalent score (80/100) for the DS202A assessment at LSE
- Developed a machine learning pipeline using R to analyze sleep data from 374 individuals
- Built predictive models implementing Regularized Regression and Random Forest Classifiers

Text Mining UN General Debates | [Portfolio](#)

- Achieved a First Class equivalent score (72/100) for the DS202A assessment at LSE
- Applied NLP techniques to a corpus of 10,952 UN speeches to analyze thematic shifts
- Employed unsupervised learning methods including LDA Topic Modeling and PCA to uncover macro-level trends

Constructing Bias-Adjusted Rating Metrics to Capture True Restaurant Popularity (Dissertation)

SKILLS

Programming Languages: Python, R, SQL

Tools: $\text{\LaTeX}$, Quarto, Git, GitHub

Languages: Japanese (native), English (advanced), Chinese (intermediate)
